

SPARE PARTS ORDER FORM

SPARE PARTS

The stock of spare parts should be determined according to pump operation conditions. If quantities of same size pumps are ordered, there may be less need for spare parts for each individual pump. If a spare pump is available, Blackmer suggests ordering the spare parts required for replacement during pump maintenance.

Ordering Instructions

The following information must be provided on the Spare Parts Ordering Sheet:

- Pump Ordering Contract Number
- Pump Name, Type, Size and Ex-works Number
- Spare Parts Name(s) and Drawing Number
