811 ANSI Pump: Repair Parts

Griswold will never compromise on quality!

- Highest quality pumps and parts thanks to world class design, testing and quality assurance programs.
- Improve your bottom line with spare parts priced 40% below other market leaders.
- Full stock of standard materials to quickly provide repair parts in ductile iron, stainless steel and CD4MCuN.

For over half a century, **Griswold™** has been manufacturing a complete line of 811 ANSI pumps for the chemical process market. Griswold parts are also used everyday to build complete pumps that perform in critical chemical processing applications around the world. And thanks to quality assurance programs that ensure all parts are manufactured to the highest standards and within their engineered tolerances, each and every part maintains a precise fit to maintain pump performance and long life.

Additionally, our pumps and parts are directly interchangeable with Goulds® 3196 model pumps.

Goulds is a registered trademark of Goulds Pumps, Inc.

Where Innovation Flows

811 ANSI Pump: Repair Parts Dare to Compare!

All Griswold pumps and parts are engineered for specific functions. That's why every Griswold application engineer has the expertise to assist you in selecting the right pump, in the right material, for your application.

Additionally, every Griswold repair part is manufactured to exacting standards. This is because these are the same parts used in the pumps we build everyday... designed for performance, tested for reliability and inspected to guarantee consistency every time.
